# Flat Seal Sbr Nbr Seal EPDM Food-grade Silicone Rubber Gasket

Gasket seal
Material: silicone, rubber
It is mainly used in automobile doors, bodies, windows, sunroofs, seats, chassis, rear trunks and other places; it plays an important role in sealing, sound insulation, waterproof, dustproof, shock absorption, energy saving and other aspects of automobiles. The special material of the sealing ring makes it have excellent elasticity and compression resistance, not easy to deform, anti-aging, ozone resistance, etc., it can work in high and low temperature environments, and the working temperature can be between -40° C and 120° C . The most important role of automobile silicone seal ring is to provide better performance for automobile seal.
